

NEWBERRY FOREST MANAGEMENT UNIT
COMPARTMENT REVIEW – YOE 2007
January 13, 2006

Compartment 13 Stand 41	Change Method of Cut from thinning (4) to Shelterwood prep (7) and change residual BA to 50 sq ft.
Compartment 26 Stand 51 Stand 75	<p>Change Method of Cut to Shelterwood prep (7) with a residual BA of 50 sq ft Add comment and change treatment period to “1” after harvest as a reference to remove the balance of the scotch pine in the stand.</p> <p>Remove the reference to the “Canoe Camp” campground from the stand comments and add to the locked box comments. Also remove the reference from the maps. Campground is closed.</p>
Compartment 39, 50, 54	No Changes
Compartment 67 Stand 65 Stand 51	<p>Change the residual BA to 70 sq ft, change Method of Cut to Shelterwood Prep Change Method of Cut to Shelterwood prep (7) and residual BA of 60 sq ft <i>***After discussions with TMS Kuhr and as agreed to via phone conversation on 03/08/06, residual BA should have been 50 sq ft due in part to the remote location of the stand. Notes have been corrected.</i></p>
Compartment 69	No Changes
Compartment 84	Code all stands as Old Growth with the exception of those ridges and stands that may be operated on this decade or in the future, basically in the south half of the compartment.
Compartment 88	No Changes
Compartment 90	<p>Stands 46, 47, and 50 – change the configuration of the stands to represent that regeneration of the stands will be only those parts of the stands east of Co Rd 453. Add – the portion of stand 451 east of Co Rd 453 will be planted to jack pine to replace those portions of stands 46, 47, and 50 not being regenerated following harvest (west of Co Rd 453). Portions of stands 46, 47, 50, and 451 west of Co Rd 453 will be prescribed for opening maintenance through prescribed burning. May want to re-number the stands to better reflect these changes.</p> <p>Correct symbols on the maps for ORV trail designation (from snowmo to ORV).</p>
Compartment 94	No Changes
Compartment 117	Make sure snowmobile trail symbol is on the map (Charcoal Grade).
Compartment 121	Wildlife Division will seed access road (ice road) to be used for timber sale access north of Highway M-28 following completion of the sale work this decade. Seeding will consist of cedar. Add comment to each prescribed stand affected.
Compartment 122	Stands 22, 16, 19, 20, 21, 30, 33, 35 (& 13 if treated) scheduled for underplanting of white pine, hemlock, and oak following harvest (per WLD). Wildlife division will contract. 400 trees per acre. Also check all 700 stands for the same prescription.
